

## **Fire Safety & Risk Assessment - The Fire Safety Regulations (Northern Ireland) 2010**

### **Duration:**

One day

### **Objective**

Part 3 of the Fire and Rescue Services (Northern Ireland) Order 2006 and the Fire Safety Regulations (Northern Ireland) 2010 came into effect on 15 November 2010, simplifying existing Fire Safety legislation in non-domestic premises and reinforcing the modern risk based approach to fire prevention.

The Fire Services (Northern Ireland) Order 1984 was repealed on 15 November 2010 and the previous fire certification process has ceased. Existing premises that have previously been subjected to that Order will most likely be compliant in terms of their Fire Safety measures. However, it will now be necessary for those premises to have a current Fire Risk Assessment.

Well trained and competent staff are the best defence against the threat of fire and the most effective way of managing alarm incidents and evacuation of your premises. This seminar workshop will provide delegates with a thorough understanding of fire safety issues and prepare them to confidently conduct fire risk assessments in their own workplace. This course includes a practical interpretation of the new fire safety guidelines effective in Northern Ireland in November 2010.

### **Contents**

Understanding fire  
The Fire Safety Regulations (Northern Ireland) 2010 - an overview  
Fire detection and warning  
Means of escape  
Fire fighting equipment  
Emergency planning and training  
Workplace fire hazards - practical assessment  
Evaluating risks and reporting  
Monitoring risks and review

### **Who should attend**

Facility managers, property managers, human resources professionals, directors and managers with a health & safety role.

### **Course benefits**

Gain a clear understanding of the key legal requirements  
Be clear on your duties and responsibilities in the event of fire  
Delegates will gain benefit from understanding how people react in the event of fire

### **Additional information**

We use a combination of scenarios and practical work to involve delegates to help them learn. Cosensa's trainers are chosen for their practical experience gained in real life situations and for their ability to inspire and motivate.

### **Certificates**

All delegates who successfully complete this course will receive a certificate of attendance.

### **Trainers background**

The trainer for this course has extensive experience in design and delivery of health & safety training programmes. They are qualified by NEBOSH (National Examination Board for Occupational Safety & Health) and Associate member of IOSH (Institute of

Occupational Safety & Health) and is a member of the Chartered Management Institute and the International Institute of Risk and Safety Management and the Association for Project Safety.
