

ISO 14001:2015 - An Introduction to the Standard and EMAS

Duration:

One day

Objective

This course is a brief introduction to environmental management systems (EMSs). It consists of a number of workshops and tutorials designed to acquaint participants with the background and main issues that implementing an EMS raises. It draws on the practical experiences of professionals who have implemented EMS systems. The course can be tailored for in-house delivery, and include workshops that are relevant to a specific site.

Contents

The various international standards - ISO 14001, Eco-Management and Audit Regulation (EMAR)

Management of Environmental Risks

Exploration of ISO14001 requirements

Timescales and resources that will be required

Documentation methods

Training issues

Key implementation issues

Integration with existing systems

Links to Corporate Governance

Who should attend

Personnel wishing to learn about the background to EMSs.

Representatives from organizations wishing to assess whether they should implement a standard such as ISO 14001, or Eco-Management and Audit Systems.

Course benefits

By attending this course, you will gain: -

A practical understanding and interpretation of the ISO 14001:2004 Standard.

An understanding of how ISO 14001 can fit into an integrated management system, including Corporate Governance.

Additional information

Consultancy assistance with attendees' EMS implementation programmes can be provided.

Certificates

All delegates who successfully complete this course will be issued with a Certificate of Attendance.

Trainers background

The trainer for this course has been delivering ISO 14001 Consultancy and Training internationally for over 18 years. He is a recognised expert in this field and previously acted as an advisor to the British Standards Institute.
