

## Accident Reporting and Investigation

### Duration:

One day

### Objective

Until the causes of workplace accidents and ill health are understood and managed, improvements will not be made in the protection of employees from work activity hazards. Employers already have a duty to investigate and report a number of such matters and that duty is being extended to cover all workplace accidents, occurrences of work related ill health etc.

### Contents

- Legislation overview
- Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR)
- The costs of accidents
- Accident causes and results
- Accident investigating and reporting
- Prevention strategies

### Who should attend

This course is suitable for Managers, Supervisors, Human resources professionals and office managers

### Course benefits

All incidents must be investigated to determine the underlying causes and identify failures of occupational health & safety management. When action is taken to address each of the factors found as a result of investigation, not only is the likelihood of a similar incident minimised, it may be instrumental in preventing accidents of a different nature in which one of these factors may play a part.

### Additional information

We use a combination of scenarios and practical work to enthuse and inform our delegates. Cosensa trainers are chosen for their practical experience gained in real life situations and for their ability to inspire delegates.

### Certificates

All delegates who successfully complete this course will receive a certificate of attendance.

### Trainers background

The trainer for this course has extensive experience in design and delivery of health & safety training programmes. They are qualified by NEBOSH (National Examination Board for Occupational Safety & Health) and Associate member of IOSH (Institute of Occupational Safety & Health) and is a member of the Chartered Management Institute and the International Institute of Risk and Safety Management and the Association for Project Safety.
